**Equipment Temperatures**

Description Freezers x 3	Temperature (Fahrenheit) Frozen
-----------------------------	------------------------------------

**OPERATOR** - The violations in operating procedure or physical arrangement indicated below must be corrected by the next routine inspection or by a date specified in this report.

**Comments:**

PIC/Manager Present During Inspection: Rick Scully

Mostly private, no public access to storage shed unless arriving to pick up product.

No out of state sales; Products are processed at DATCP approved facilities and either transported directly to the customer or to the farm for frozen storage.

No water test has been performed since 2019.

- It was recommended that their water be tested for bacteria and nitrates at least once a year.
- Will likely be testing water this year and will reach out once results have been received for record.

Currently slowly transitioning from whole raw cuts of meat to meat sticks due to shelf stability and easier transporting to local shops and farmer's markets.

All freezers are at temperature and have a thermometer for monitoring.

There is a panel along where the A/C unit has been installed that is missing but will be replaced soon. All surfaces within the storage area are smooth and easily cleanable.

Provided documents on vomit/diarrhea clean-up procedures and kit materials as future reference if owner decides to open a shop to the public.

**No violations during this inspection!**

---

Any operator aggrieved by an order of this department under this chapter may request a hearing as provided in ch.227 statute, if state licensed, or a local ordinance if licensed by an agent health department.

Person in Charge

Sanitarian
